EXPERIENCE

Polaris Smart Metering **May 2024 - Feb 2026**

Software Development Engineer I *Jaipur, Rajasthan*

- Built **full-stack** solutions: Android apps that read **DLMS** smart meters over secured serial **UART**, and **Node.js + PostgreSQL** backend services syncing meter data to the organization's Head End System.

Meter Setu – DLMS Smart Meter Technician App

- Built **Meter Setu**, the org's flagship app for secured DLMS meter reading, shipped across **5 state projects** (2 on Play Store) and used by **hundreds of technicians** in **UP, West Bengal, Manipur & Ladakh**.
- Demoed the app in government utility tender presentations, contributing to new business wins.
- Integrated the **Gurux DLMS** library for core protocol communication, resolving key blockers directly with Gurux's open-source maintainers.
- Raised crash-free users to **98%+** on low-end devices through iterative release cycles with the validation team.

Field Force Management (FFM) App – Ladakh

- Owned field-issue resolution for a legacy **Android + Django** app serving hundreds of technicians and consumers across Ladakh; reduced crash rate to **<1%** and fixed **70%+** of reported backend issues.
- Shipped **5+** Play Store releases and **3-4** production backend updates; removed **3,000+** dead lines from 10k+-line files, improving performance and maintainability.

Consumer App – South Bihar (SBPDCL)

- Shipped **4-5** major releases, including new features and a critical **Razorpay** payment-gateway fix; cut crash rate to **<1%**.
- Resolved production issues with field supervisors and PMs; updated Play Console listings 4x for policy compliance.

Putatoe Solutions **Feb 2024 - Mar 2024**

Android Developer Intern *Gorakhpur, UP (Remote)*

- Built an internal manager portal app using **Android SDK** and **REST API** integration.
- Fixed navigation and layout issues across multiple screens of an e-commerce consumer app; refactored **Java/XML** code for performance and readability.

PROJECTS

Penny Pages – Expense Tracker | Kotlin, Jetpack Compose **2026**

- Built an offline-first expense & budget tracker with recurring payments, savings goals, 5 interactive chart types, a **Glance** home-screen widget and support for **28 languages**.
- Architected a **multi-module** app (feature/core modules, Gradle convention plugins) using **MVVM**, **Hilt**, **Room**, **Coroutines/Flow** and **Navigation 3**.
- Added biometric app lock, **WorkManager** reminders, CSV import/export, Baseline Profiles, and unit + Room migration tests.

Glintbox: Status Keeper | Kotlin, Jetpack Compose **2026**

- Built and published a private, offline status-saver app on **Google Play** under my own developer account (Bits4Bytes), with no internet permission, ads or analytics.
- Handled scoped storage on Android 8–16 via **SAF** and **MediaStore** (Play-policy compliant), with **WorkManager** auto-save, **ExoPlayer** video and Material You theming.

OTP Fill Android | Jetpack Compose **2026**

- Published a reusable Compose OTP input library on **JitPack** (v1.0.2) with animated digit boxes and full UI customization.
- Used Compose's native Autofill API (**AutofillType.SmsOtpCode**) for SMS OTP auto-fill with zero extra permissions or broadcast receivers.

Bluetooth Connect | Android **2025**

- Built an app that discovers and pairs with nearby Bluetooth devices.
- Added chat between two devices using a client-server socket connection.

Telnet Client | Android **2025**

- Built a Telnet client for pinging and connecting to IPv4 addresses.
- Styled the terminal output after Windows Command Prompt.
